EDUCATION

Bachelor of Science in Computer Science

April 2026

MacEwan University | Edmonton, AB

Relevant Coursework: Operating Systems, Computer Networks, Data Structures & Algorithms, Software Engineering

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, C#, Kotlin, C, SQL

Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS

Databases: PostgreSQL, pgvector, SQL Server, MongoDB, MySQL

Developer Tools: Git, GitHub, Postman, Vercel

Software Practices: REST APIs, Agile, Unit Testing (JUnit 5)

RELEVANT EXPERIENCE

Technical Assistant | Edmonton Public Schools | Edmonton, AB

July 2025 - August 2025

- Provided Tier 1 technical support by investigating, diagnosing, and resolving Windows hardware, software, classroom technology, and audio-visual issues while configuring and deploying Chromebooks, desktop workstations, and Smart Boards during district-wide deployments.
- Installed and organized classroom network and power cabling, calibrated Smart Boards, tracked technology assets, and documented inventory to support reliable classroom technology deployments.

Entrepreneur | Garden Yeg | Edmonton, AB

February 2024 - Present

- Operated a family-owned retail business by managing customer service, inventory, order fulfillment, and social media marketing while balancing a full-time Computer Science degree.

PROJECTS

GRC Compass - AI-Powered Compliance Platform | React, Next.js, TypeScript, PostgreSQL, pgvector, Google Gemini, REST APIs, Git, Vercel

- Built and deployed a full-stack AI-powered compliance platform using React, Next.js, TypeScript, PostgreSQL, pgvector, and Google Gemini to automate document analysis and semantic search.
- Developed REST APIs to process uploaded documents, generate vector embeddings, and perform semantic search using PostgreSQL and pgvector.
- Collaborated in an Agile team using Git and GitHub to develop and deploy software features.

Alberta Lakes Monitoring Platform | React, Node.js, JavaScript, MongoDB, REST APIs

- Developed a full-stack web application using React, Node.js, and MongoDB to visualize and analyze Alberta lake environmental data.
- Designed REST APIs and dynamic filtering for searching and analyzing lake conditions.
- Integrated MongoDB to store environmental data and support dynamic filtering and responsive user experiences.

Secure Mail Transfer Protocol | Python, TCP Sockets, RSA, AES, SHA-256

- Designed and implemented a secure client-server email application using Python TCP socket programming.
- Implemented RSA authentication, AES encryption, and SHA-256 integrity verification to secure client-server communication.
- Built a multi-client TCP socket architecture enabling secure communication between authenticated users.
